

# Get the dual-core mobile performance you deserve in a built-to-order notebook designed for the way you live.

## *Customize your next notebook for the way you live and work.*

Step up to the power of dual-core processing with high quality audio and enhanced high-definition video, great power management, and expanded connectivity of the newest-generation of Intel® Centrino® Duo mobile technology-based notebooks. Your dream notebook is finally here.

## *Get the powerful PC notebook with the breakthrough mobile capabilities.*

Enjoy up to 94% faster processing<sup>1</sup> and twice the graphics performance over previous generations of Intel® Centrino® mobile technology-based notebooks. With the next generation Intel® Centrino® Duo mobile technology-based notebook, enabled with improved battery life and A/B/G wireless connections for greater freedom and flexibility, work or play as hard as you want, where you want, for longer than ever.

## *Travel the world, and your world travels with you:*

- Finish important work faster as dual-core processing lets you power through demanding programs, render digital content, and watch a video on a business news Web site—all while running the latest security software in the background—before speeding off to your next appointment.
- Create and share thrilling multimedia, complete with home theatre-quality audio and 3D graphics, as media streaming enables you to enjoy a brand-new action movie on DVD, and then play the 3D game it was based on.
- Talk to colleagues and loved ones anywhere using Voice over IP through your notebook.
- Work and play over a stronger Wi-Fi connection, automatically linking to more available networks so you can stay on top of vital email and Web sites.

## *Faster maintenance keeps you mobile:*

Notebooks based on new Intel Centrino Duo mobile technology can be designed with spec-compliant ingredients that are interchangeable, making it easier for your Intel Product Dealer to maintain or replace parts, as needed.

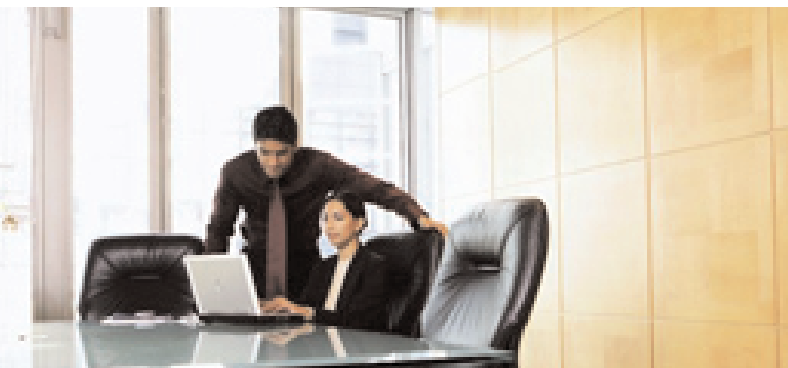

## *When you're ready to upgrade, so is your notebook:*

When you need new capabilities, your Intel Product Dealer can add a bigger hard drive, more processing power, increased battery capacity, the latest CD/DVD player or more to help you stay competitive, connected and current.

Ask your Intel Product Dealer for a notebook with interchangeable ingredients that can keep up with your demanding schedule and adapt to your ever-changing needs.

Accelerate and enhance your on-the-go lifestyle with dual-core Intel® Centrino® Duo mobile technology.

#### On the job:

You're doing several big things at once, from the comfort of your favorite Wi-Fi enabled coffee shop: Editing a 5-minute video presentation, downloading music for the audio track, compressing it all for Web streaming, and then uploading the encrypted file to your offices in Munich and Taipei. While your digital content renders, you scan the 24-hour TV news channels – but headlines are all you have time for, because your notebook has already powered through a digital processing job that used to take hours; and, the latest security running in the background has let you work in total privacy.

#### On the road:

International business trips are a lot more enjoyable now that you can watch the latest DVD movie release in home theatre quality sound and graphics. Once on the ground, your notebook automatically finds and negotiates your connection to the terminal's Wi-Fi "hotspot" so you can check email while your traveling companion simultaneously phones the office, half a world away, using your notebook's Voice over Internet Protocol (VoIP) software. And best of all, you never had to search out an electrical outlet – your notebook "slept" when you did, and optimized its battery life for nonstop performance.

#### After hours:

Your dual-core notebook makes you a business success by day and the center of family attention by night. In the den, you use pro-quality audio editing software and headphones to assemble and mix the piano tracks your daughter just recorded. Meanwhile, your spouse listens to earlier compilations on CD through a separate audio feed connected to your home stereo system. Later, upstairs in front of the big-screen TV you and your son engage in 3D combat, immersed in hi-def sound, as your notebook connects to the family home theatre system.

**Carry dual-core power and wireless freedom in a next-generation notebook built just for you!**

Talk to your Intel product dealer today about customizing your next notebook with the excitement and exhilaration of new Intel Centrino Duo mobile technology!
